OUR Mission

EnviroFlight® develops high quality, sustainable ingredients for animals and plants in a socially responsible way. Our systems upcycle regionally available by-products from human and animal food industries to produce high quality ingredients while minimizing the environmental and financial impacts of animal protein production. By doing so, EnviroFlight® contributes to the health of our planet and the people of our world.

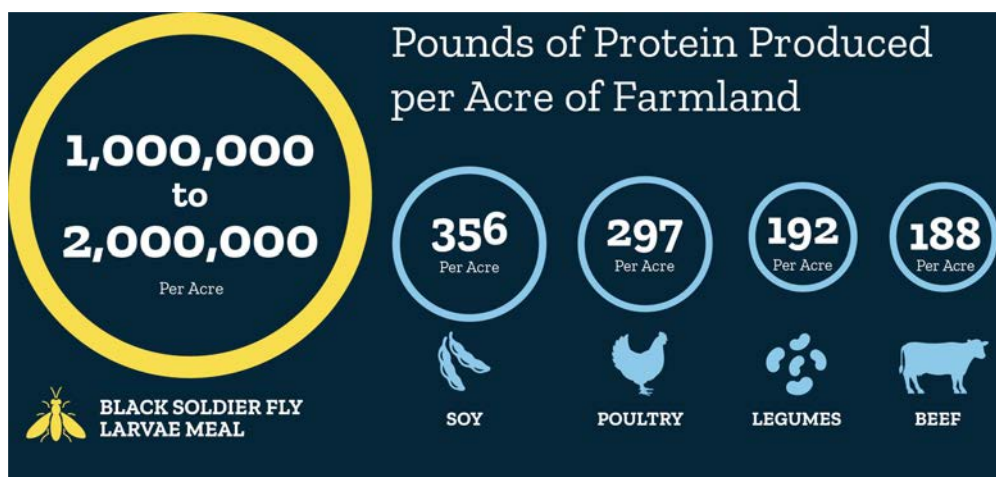

ENVIROFLIGHT®

Nutritious, Sustainable, and Consistent Quality

At EnviroFlight®, we produce a variety of high quality Black Soldier Fly larvae (BSFL) products including:

- Enviro™ Bug (whole dried BSFL)
- Enviro™ Meal (BSFL meal)
- Enviro™ Oil (BSFL oil)

Our sustainable, high protein, nutrient rich Black Soldier Fly Larvae products can be used as an ingredient in manufactured animal feeds or as a supplement to be used in a complete diet for a variety of species (pending AAFCO approval).

Pounds of protein will vary depending on production intensity. Based on vertical and multiple crops per year. Source internal EnviroFlight® calculation. USDA;FAO/WHO/UNICEF protein Advisory Group 2004.

High quality sustainable ingredients derived from Dried Black Soldier Fly Larvae (*Hermetia illucens*)

NUTRIENT	ENVIROBUG™ (Dry Larvae)*	ENVIRO™ Meal**	ENVIRO™ Oil^
Moisture, %	8.00 (10.0 Max)	5.00 (10.0 Max)	-
Crude protein, %	34.0 (34.0 Min)	43.5 (40.0 Min)	-
Crude fiber, %	6.00 (10.0 Max)	6.00 (8.0 Max)	-
Acid detergent fiber, %	7.20	8.00	
Crude Fat, %	34.0 (32.0 Min)	Range: 12 – 20 (12.0 Min, 20.0 Max)	98.0 (98.0 Min)
Ash, %	8.75 (10.0 Max)	12.5 (15.0 Max)	-
Ca : P	3.75 : 1	3.5 : 1	-
Calcium, %	3.00	3.15	-
Phosphorus, %	0.80	0.90	-

Values are on as-is basis and are typical, based upon current averaged analysis (Oct 2018); *Next update, Jan 2018*
Guaranteed Analyses are shown in **(bold)**.

* Dried Black Soldier Fly larvae (whole) are defined for use in poultry, salmonid fish and wild bird feed as a source of protein and fat - T60.117(B) Dried Black Soldier Fly Larvae. AAFCO 2018 Official Publication. Association of American Feed Control Officials. Oxford, IN.

** Dried Black Soldier Fly larvae (ground) has been defatted and is defined for use in poultry and salmonid fish as a source of protein and fat - T60.117(B) Dried Black Soldier Fly Larvae. AAFCO 2018 Official Publication. Association of American Feed Control Officials. Oxford, IN.
Meal Crude Fat level will range based on extraction method used.

^ Dried Black Soldier Fly larvae oil is at this time not defined by the Association of American Feed Control Officials (AAFCO) as an ingredient for animal feeds.

EnviroFlight® products are all natural, free of added hormones and raised without antibiotics or pesticides.

FEEDING DIRECTIONS

This product is NOT a complete feed.

Consult your nutritionist for diet formulation to the specific needs of the intended species.

SHELF LIFE

Store product in dry area and maintain cool environmental conditions. After opening, ensure proper sealing of packaging to avoid moisture and air.

Use within 12 months of manufacturing (see Best Use by Date).
